Incremento de Producto Potencialmente entregable

"A GOAL IS A DREAM WITH A DELIVERY DATE"

GIP is unique in its type, facilitates the management of portfolios, programs and projects based on world-class metrics.

SOME CONFIGURABLE METHODOLOGIES

SOME FUNCTIONS

Project Charter	Cost and procurement management
Requirements Engineering	Generation of project or program schedules
Alignment baseline, cost and time	Change management and control
EDT / WBS and EDT / WBS dictionary	Stakeholder and communications management
Performance Resource Management	Configurable work packages

OBJECTIVE

Manage agile and easy the life cycle of portfolios, programs and projects, within the constraints of cost, time, scope and quality.

WHY GIP?

AGILE

Create integrated documentation quickly and easily

INNOVATIVE

It is an attractive, adaptable and efficient web application that facilitates its use from different devices.

INTUITIVE

The navigation in the system is done efficiently and efficiently, showing information within reach of a click.

INTEGRAL

It manages the complete cycles of the life of a project, program and portfolio, in a single platform.

ORGANIZED

It allows exploring and specifying the different stages in which projects, programs or portfolios are found.

The system is focused on projected companies, professionals responsible for project management and in general for all stakeholders who manage, direct and carry out projects, programs and portfolios.
